### Job Overview

#### URGENT! Senior Systems Administrator (AWS, Linux) - Dublin, Remote

I am excited to be partnering with this Innovative Software Company who are recruiting for a permanent Senior Systems Administrator to join their cutting edge engineering team.

Reporting to the Engineering Manager, you will be an **AWS SME** with responsibility for the **design, development and implementation of large cloud projects.**

You will work with the engineering team to design and deliver the optimal Cloud solution to meet the needs of each project. You will design, deploy and implement AWS applications, and design and development strategies and best practices for application deployment and also infrastructure maintenance. You will have excellent problem solving skills and will have responsibility for troubleshooting incidents, identifying causes and putting preventive measures in place.

As a Senior Systems Administrator/Cloud Engineer, you will have a proven track record in **Linux administration**, at least 3 years' experience **designing, developing and deploying AWS applications** and a proven track record working with a variety of **DevOps technologies and tools.**

This is an exceptional opportunity to join an exciting company constantly working on next generation innovation. You will be offered the chance to work on some cutting edge, challenging and rewarding projects that will offer you the opportunity to expand your skillset and learn new and emerging technologies. You will be offered a competitive salary and excellent benefits. Even if you are not actively looking, this role is worth reaching out for a confidential chat.
